Risk Navigation with Clarity: Precision Meets Explainability

Risk Story	
Sep, 2022	Electrolux to divest Swiss real estate
Oct, 2022	Electrolux to divest Memphis factory
Oct, 2022	Risk pattern analysis has identified an abnormal level of asset disposal losses through the income statement, this could signal some increased requirements for cash flow, the start of a monetization policy or a change in strategy.
Oct, 2022	Continual tracking of the general financial health of the company is indicating a continued negative trend. This analysis includes a combined view of; sales growth, debt leverage, weighted probability, cash holdings, market to book, leverage/gearing.
Oct, 2022	Electrolux to lay off 4,000 people worldwide citing heavy losses in third-quarter
Nov, 2022	Equity market analysis shows increased levels of short positioning, this could be a signal that the markets future perception of the company is turning negative.
Nov, 2022	Analysis of high conviction equity investors who have over allocated capital versus their benchmarks to the company are now reducing their exposure, this could be an early

Emmalyn - Fundamental Risk Analyst Aug'23

"[Company]'s stock fell sharply by 23% after reporting a surprise loss in the second quarter of 2023, amid weak market demand and lower consumer spending. The company saw a reduction in asset liquidity and plans to sell assets worth \$1 billion while considering further cost reductions. With the 12-month earnings yield at a 10-year low, there are concerns about overvaluation. The firm's credit rating was downgraded to "B" with a negative outlook, after a \$3.67 billion decrease in asset market value, potentially affecting funding costs."

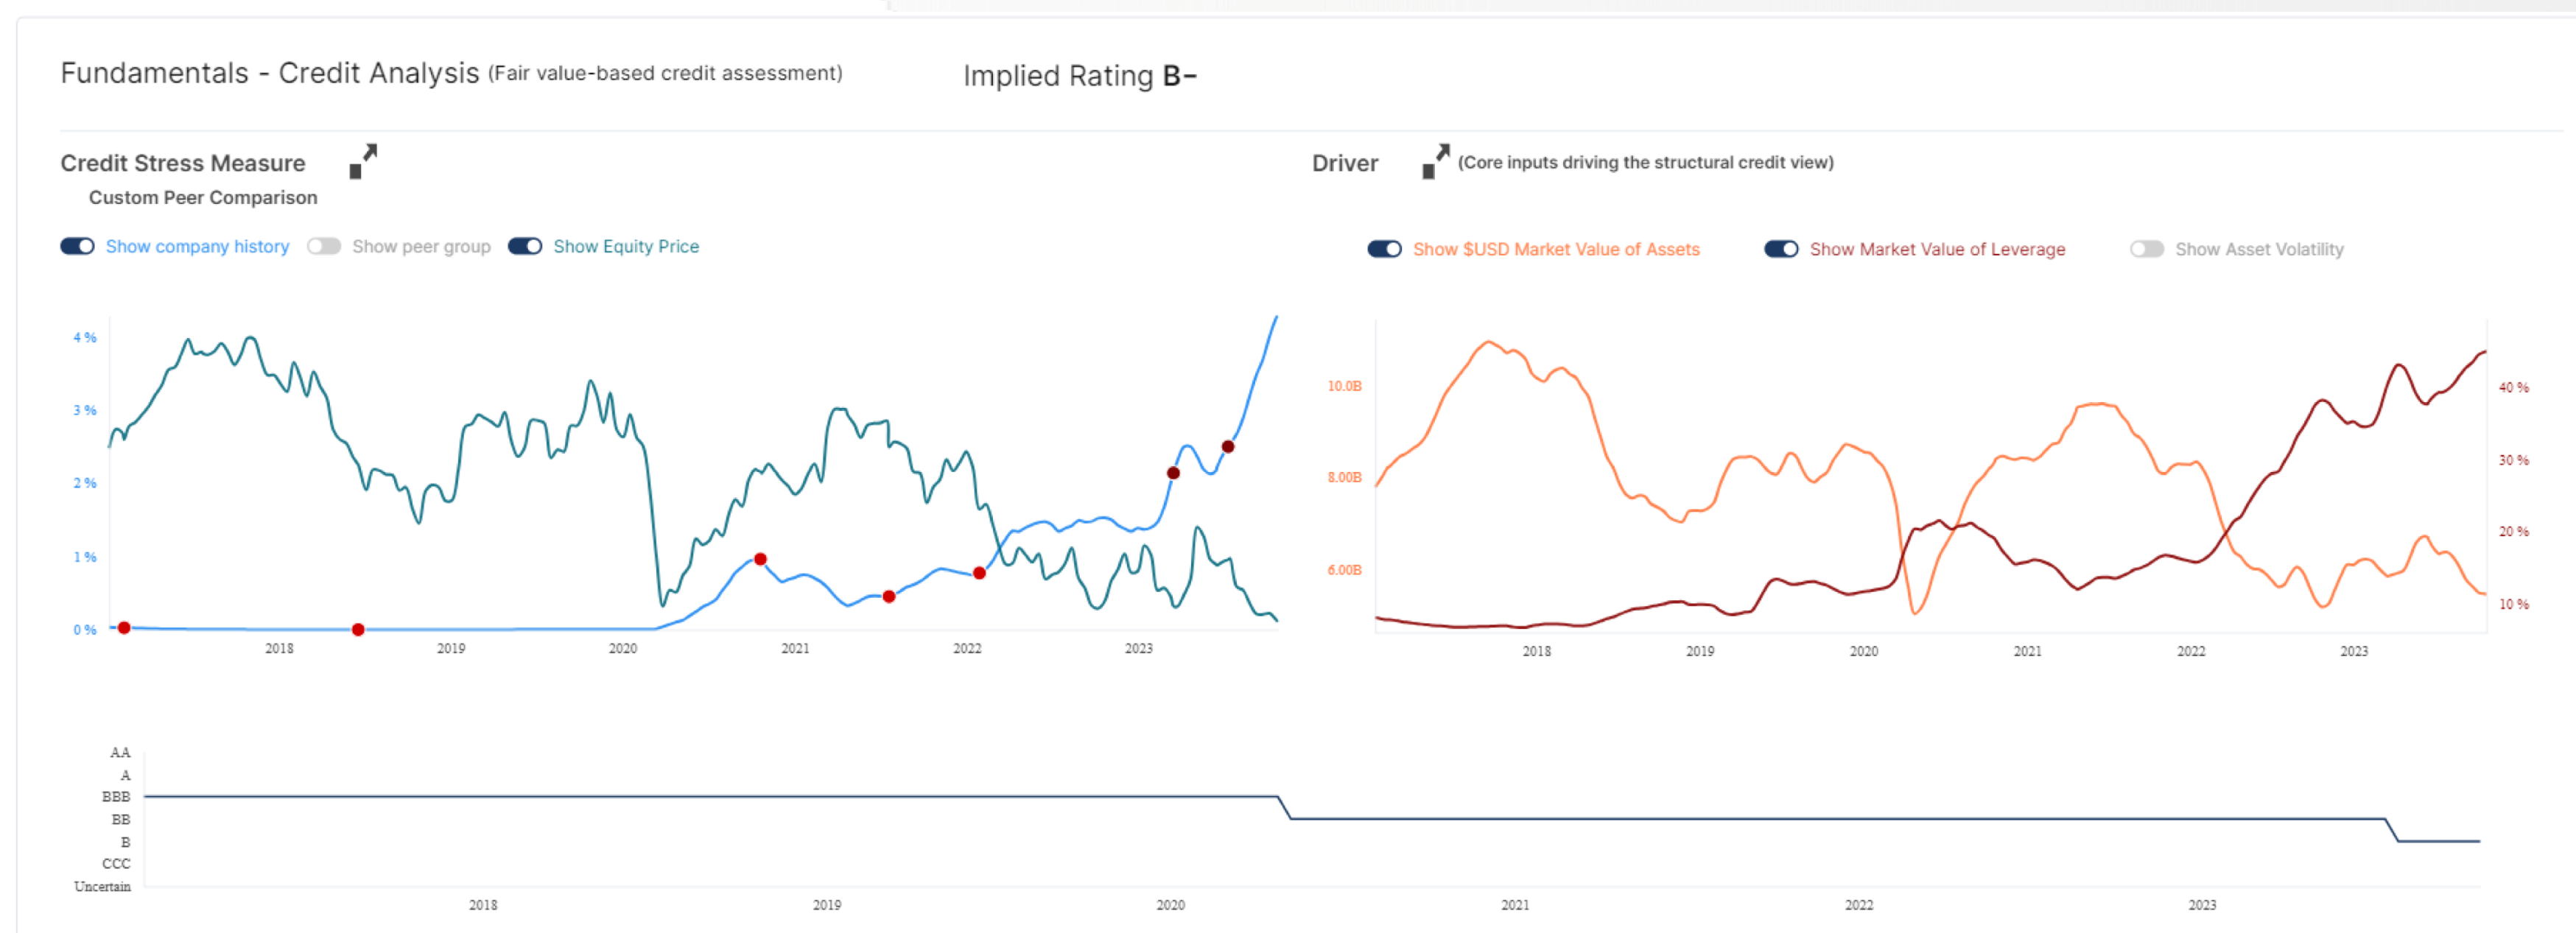

Visualising Funding, Assets, and Outputs: The Emmalyn Advantage

Overview: This 9 chart scan provides a snapshot into a company's financials, connecting Capital Structure, Asset Composition and Operational Outputs. In addition, Emmalyn employs discrete models for stress detection in different sectors like Banks, Insurers, Property Companies and Non-Banks.

Chart Purpose: Visualising the evolution of company's fundamental history allows for timely detection of irregularities, pin-pointing where further investigation may be required. Displaying the financial health of the company's historical norm versus industry peers enhances the speed-to-decision regarding risk mitigation.

Pioneering Credit Risk: Emmalyn's Approach

Where traditional agencies falter, Emmalyn thrives, efficiently gathering issuer information to deliver prompt and objective implied credit ratings. Monitor rating trends, assess the potential for a credit event over the upcoming 12 months, and gain a holistic view by integrating equity and credit insights. Emmalyn's horizon scanning ensures you remain, informed and prepared for what the future holds.
